

AU400 USB Converter

(Telephone Headset to USB Converter)

Description:

The perfect solution for connecting your standard Accutone phone to a USB socket is the AU400 USB Converter. The new innovative model easily converts any Accutone telephone headset into a standard USB connection without any other hardware connection between the two. This product is ideal for offices with limited desk space as its lightweight and compact design makes it the smallest product in the market at present.

The AU400 USB Converter offers dual-medium handsfree communication, a digital audio controller for volume functions, a mute switch and an Accutone Quick Disconnect connection. The unique disconnecter allows the user to put a call on hold, disconnect the headset, reconnect and then continue the call. This USB Converter is designed to maximise user convenience. Features such as a multiple LED-status indication obviously display the speaker and microphone mute status whilst a master volume control enables the user to easily control volume levels ranging between +12dB and -34.5dB.

The AU400 USB Converter really is a must have for users wishing to operate their telephone headsets with ease. To compliment this fantastic product, Accutone USB and driver software is also supplied and is suitable for a variety of operating systems such as Windows 98 SE/2000/Me/XP or Apple Macintosh OSX.
