

CM300 Computer Binaural Headset

Description:

This stylish USB headset is designed to pair seamlessly with the AU300 adapter. There is an abundance of features including 3.5mm gold-plated stereo plugs for optimal sound performance, a stereo speaker output, two-sided speakers and a one-sided cord. Additional features, such as an optional noise cancelling microphone, make this product truly ideal for professional call centre environments. Ultimate comfort is offered by its stylish ergonomic design and the extendable headband. However, comfort does not compromise the strong durability of the CM300 binaural headset which is more than capable of withstanding continuous, everyday use. The performance-driven convenience of this model is demonstrated by its flexible compatibility with devices such as MP3 players or digital recorders, making this product a must-have for all serious business and call centre professionals.
