

CM800 Computer Binaural Headset

Description:

The Accutone CM800 is a multi-media headset offering phenomenal value for money. It may be basic; however the features it offers put this headset at the top of its game. It has an incredibly comfortable and lightweight framing with multiple adjustment points and an expandable headband, ensuring it fits any head shape both effectively and comfortably. The soft leatherette ear cushions offer the wearer ultimate comfort over extended periods of time, making this headset ideal for longer office hours.

This binaural headset is equally suited for personal use at home. The convenient 3.5mm stereo plug is universal to almost any sound device giving it the cross platform ability to connect directly into any soundcard or USB adaptor. Additionally, the rotatable microphone boom makes the Accutone CM800 a popular choice for users requiring a headset for internet based communication with software such as Skype. For those desiring a variation in style, it's even available in two modern colours, stylish metallic silver or a midnight black.
