

H30 RJ11 Lightweight Monaural Headset

Description:

If you're looking for an elegant & discreet headset, the H30 Lightweight Monaural Headset is for you. Uniquely made from strong but light aluminium, this headset will become the best piece of telecoms kit in your office. It offers luxury style comfort as well as a slick stylish design. The in-the-ear wearing style and rotatable ear-bud work to make using this headset a delight. The ear hook is made of soft rubber so it is both comfortable and will adjust to any preferred wearing style. The H30 offers comfort and convenience making it perfect for extended use. As well as being unobtrusive it is built to withstand the abuse that daily office life can throw at any well used technical equipment. It may be small, but don't be fooled, the aluminium is extremely durable and the rubber ear hook is designed to withstand heavy usage.

It comes with the standard Accutone ClearTube microphone that looks stylish but is also easily replaceable should you want to change it for different users. More over it offers substantial quality in signal. This feature, matched with the industry standard Acoustic Shock Protection (ASP), make it one of the highest quality sound signal headsets in its price range. It even comes with a handy quick disconnecting cable.

Features:

- Made from strong but light weight aluminium
- in-the-ear wearing style
- clear, high quality signal
- Acoustic Shock Protection (ASP)
- quick disconnecting cable
