

TB310 Binaural Noise Cancelling Headset

Description:

The TB310 Binaural Noise Cancelling Headset is all about clear signal and comfortable design. Not only does the noise-cancelling microphone filter out unwanted background sounds but the acoustic shock protection (ASP) circuitry will also give an even signal volume throughout the call.

While a crisp and clear audio signal is important, the wearer's comfort is a top priority as this headset will be worn for long periods of time. The headset has been designed to ensure the utmost comfort for the user. The leatherette or foam ear-cushions are fully interchangeable. In addition to this, the multi-adjustable headband makes the TB310 Binaural Noise Cancelling headset extremely comfortable to wear and the single cord design enables users to move around more freely.

The TB310 is made from modern yet lightweight strong plastic, providing the wearer with the maximum comfort at all times. This headset is perfect for call centres and office workers.

Features:

- *Over-the-head corded headset*
- *Made from a light-weight plastic*
