

TB310VT Binaural Voice Tube Headset

Description:

The TB310VT Binaural Headset is the pinnacle in communication comfort. It's extremely lightweight with a 210 mm headband and multiple adjustment points for complete personalised comfort and can be extended up to 40mm. The ear-pad comes with leatherette or foam ear-cushions. These characteristics make this headset incredibly adaptable while ensuring comfort over extended periods of use.

In addition to this, the TB310VT Binaural Headset has a fully rotatable microphone boom, enabling the wearer to adjust its positioning in order to achieve optimum microphone clarity. Further to the excellent microphone quality is noise-cancelling technology and acoustic shock protection (ASP) circuitry; both further contributing to an overall improved sound clarity.

Features:

- Over-the-head corded headset
- Made from a light-weight plastic
- Single sided cord for binaural speakers
- Multiple adjustment points
- Leatherette & foam ear-cushions included
- Fully rotatable and extendable voice tube
- Both speakers also contain acoustic shock protection (asp)
- Quick disconnection cable (qd)
