

## TB710VT Binaural Voice Tube Headset

### Description:

The TB710VT Binaural Voice Tube Headset features the ground-breaking Accutone clear tube design. It fits snugly over the head with the bendable microphone arm adjustable to fit all face-shapes and user preferences. Don't be fooled by the elegant and stylish design because this headset is as tough as they come. It features acoustic shock protection (ASP) circuitry and a quick-disconnecting cable for convenience. Moreover the pre-amplified microphone attunes automatically to the outgoing volume level giving you the most consistent signal you could ever ask for.

Don't be fooled by the ultra-slim, elegant and stylish design because despite being made of lightweight plastic this binaural headset is as tough as they come. The headset includes a variety of features included for maximum user compatibility such as a single 300mm cord, enabling the wearer to move around freely. It features acoustic shock protection (ASP) circuitry and a quick-disconnecting cable ensuring user ease and convenience. Moreover, the pre-amplified microphone attunes automatically to the outgoing volume level giving you an extremely consistent signal of the highest standards.
