

TM710VT Monaural Voice Tube Headset

Description:

The TB710VT Monaural Voice Tube Headset features the ground-breaking Accutone Cleartube design. It fits snugly over the head due to an expandable headband and bendable aluminium voice tube which is retractable and adjustable to fit all face-shapes and user preferences. The monaural ear piece can also be rotated 360 degrees in both directions, while the adjustable and removal rubber ear pad can be replaced by other pads of varying sizes.

Don't be fooled by the ultra-slim, elegant and stylish design because despite being made of lightweight plastic this monaural headset is as tough as they come. The headset includes a variety of features included for maximum user compatibility such as a single 300mm cord, enabling the wearer to move around freely. It features acoustic shock protection (ASP) circuitry and a quick-disconnecting cable ensuring user ease and convenience. Moreover, the pre-amplified microphone attunes automatically to the outgoing volume level giving you an extremely consistent signal of the highest standards.
